Mr. Blaine Johnson
1625 E Shadow Valley Dr.
Ogden, Ut 84403

Dear Blaine:

Re: Ogden/Weber commissioner data

Enclosed are lists of station names as they appear on the Divert database for Weber and Ogden. I talked with Boyd and he informed me that because the station names you report the data under, may be different than our station name, he has a system to link from your names to the correct station in which to download your data. However, it is not always obvious which stations are to be linked as commissioners change names, stations are added, deleted and moved. As you mentioned, we still need the 1994 and some of the 1995 data for the Ogden system. He also recommends data that is more than two years old should be updated manually from reports rather than taking a chance on introducing additional errors from automated updates. If additional data needs to be entered or modified, we will need to do it manually.

Also enclosed are the 1993, 1994 and 1995 System Diversion Summaries for both systems. These show the total annual flow for each station where data has been entered, with the exception of reservoirs. Hopefully, you can tell what stations we have not downloaded and if it is all there.

You should be able to see what data we need to enter by browsing the "Record Period F4" on the General Description Screen.

If I can be of further assistance, please contact me.

Sincerely,

Bonnie D. Duncan, Secretary
in the Distribution Office

BDD

Encls.

P.S. Have a great day!
